PROFESSIONAL SUMMARY

Senior iOS Developer with 7+ years building production apps in Swift, UIKit, SwiftUI, and Objective-C. Delivers HIG-aligned interfaces, secure and scalable RESTful integrations, and reliable releases with XCTest, unit and UI testing, code review, and QA. Built complex features for a telecom app serving millions and co-founded a mobile studio whose products exceeded 100,000 monthly active users. Experienced in MVVM and Coordinators, performance optimization, mobile security engineering, Git delivery, cross-functional collaboration, and mentoring.

TECHNICAL SKILLS

iOS: Swift, Objective-C, UIKit, SwiftUI, Xcode, iOS frameworks, MVVM, Coordinators

UI & standards: UIKit interfaces, SwiftUI views, UI/UX implementation, Apple Human Interface Guidelines

Quality & testing: XCTest, unit testing, UI testing, code review, QA, analytics, crash reporting

APIs & security: RESTful APIs, JSON, XML, mobile security engineering, secure backend integration

Performance & delivery: Image processing, custom compression, Git, App Store publishing, release coordination

Leadership: Team leadership, project management, mentoring, agile delivery, cross-functional collaboration

PROFESSIONAL EXPERIENCE

iOS Engineer - Integration Point

Muscat, Oman | February 2024 - April 2025

- Developed and maintained production features for a large-scale telecom iOS app serving millions of users.
- Implemented complex UIKit interfaces within an MVVM and Coordinators architecture.
- Developed performance-critical image-processing pipelines for media-heavy features.
- Collaborated across engineering and business stakeholders to coordinate release and delivery workflows.
- Integrated apps with backend services using XML-RPC, JSON-RPC, PostgreSQL, and custom Python modules.

Cofounder, Lead Programmer & Project Manager - INKA.PS

July 2017 - September 2023

- Built and maintained multiple iOS products from concept through App Store release and ongoing operations.
- Led programming, code reviews, QA, and delivery across developers and designers while mentoring team members.
- Drove products to the App Store top charts in the MENA region, with apps exceeding 100,000 monthly active users.
- Owned backend services, REST API integrations, and release operations powering production mobile applications.
- Managed scope and collaborated with developers and designers to deliver user-facing features.

Software Engineer - Jorindo

November 2015 - June 2017

- Co-developed Java-based CRM and accounting systems with database integration and ERP-style modules for invoicing, deliveries, and financial reporting.
- Led development of a companion mobile app for trip management, deliveries, and invoices, optimizing it for extremely low data usage through custom compression.

SELECTED IOS PROJECTS

Telecom Provider App - Swift, UIKit, MVVM, Coordinators. Delivered complex UI and media-processing features at million-user scale.

Commerce & Ordering Apps - Swift, UIKit, RESTful APIs, JSON. Built catalog, cart, ordering, and backend-integrated consumer flows.

Government Weather App - Swift, UIKit, XML. Delivered push alerts and location-aware live data.

EDUCATION & LANGUAGES

Bachelor of Science in Computer Engineering | Islamic University of Gaza, Palestine

Arabic: Native | English: Professional working proficiency | Spanish: Basic, currently improving
